

Cyber Coverage

DOES YOUR CLIENT QUALIFY?

Cyber markets are asking applicants the following questions **before issuing coverage**

- Do you allow remote access to your network?
- Do you use multi-factor authentication (MFA) to secure all remote access?
- Do you require a virtual private network (VPN)?
- Do you use multi-factor authentication (MFA) for cloud-based email account access?
- Do you regularly (at least annually) provide cyber security awareness training, including anti-phishing, to all staff who have access to your organization's network or confidential/personal data?
- Do you implement critical patches (within 2 months)
- Do you scan incoming emails for malicious attachments and/or links? Do you protect all of your devices with anti-virus, anti-malware, and/or endpoint protection software?
- Do you regularly back up critical data?

If "no" is answered to any of the above questions, cyber markets will be limited.

Our carriers offer risk management resources to help the insured avoid breaches!
